PRIYA PATEL

Computer Science Undergraduate | Software Development & Applied AI
Ahmedabad, Gujarat, India | patelpriya17151@gmail.com | linkedin.com/in/priya-patel-27062b379
github.com/priya-patel-dev | priya-dev.vercel.app

PROFESSIONAL SUMMARY

Computer Science undergraduate and AI Software Developer Intern with hands-on experience building software, AI, and data-driven projects in Python, Flask, and JavaScript. Skilled in REST APIs, SQL and NoSQL databases, machine learning, and vision-language model fine-tuning. Researching security vulnerabilities in Retrieval-Augmented Generation (RAG) systems and an open-source contributor (GoFr). Seeking AI/ML, Generative AI, Python, and backend engineering internships.

EDUCATION

B.Tech in Computer Science and Engineering | Karnavati University, Gujarat, India | Expected Graduation: 2029

TECHNICAL SKILLS

Programming Languages: Python, C, C++, Java, JavaScript
AI & Machine Learning: Machine Learning, Generative AI, LLM APIs, Retrieval-Augmented Generation (RAG), Embeddings, Fine-tuning (PEFT/LoRA), PyTorch, Hugging Face Transformers, scikit-learn, Pandas, NumPy
Backend & APIs: Flask, REST API Development, API Integration
Web Development: HTML, CSS, JavaScript, React, Three.js, WebGL
Databases: MySQL, PostgreSQL, MongoDB, SQL
Developer Tools: Git, GitHub, VS Code, Google Colab, Vercel, Netlify
Design & Prototyping: Canva, Framer, Figma
Currently Learning: Data Structures and Algorithms, Agentic AI, Model Evaluation, Software Testing

EXPERIENCE

AI Software Developer Intern | Appriqa Pvt. Ltd. | October 2026 – Present (Part-time)
- Develop AI-powered software features across frontend and backend, with database integration, testing, and optimization while exploring Agentic AI.

Python Developer Intern | Axlero Solutions | October 2026 – January 2027 (Part-time)
- Build Python backend services, REST APIs, SQL integrations, and automation scripts.
- Debug, test, and improve performance; participate in code reviews and team-based development using Git.

Google Student Ambassador | Karnavati University | April 2026 – September 2026
- Facilitated a Google Gemini event on campus to introduce students to generative AI tools.

Event & Program Operations Intern | School to Startup | October 2026 – Present
- Support event coordination, program execution, and operational planning.

Brand Ambassador | Rao Consultant | May 2026 – June 2026
- Represented the organization, built brand awareness, and engaged student communities.

PROJECTS

VayuSatya – Hyperlocal Pollution Evidence Engine | Team of 2 | github.com/priya-patel-dev/vayuSatya
- Built the interactive dashboard (HTML, CSS, JavaScript, Chart.js) showing air-quality trends alongside wind data for 3 industrial areas in Gujarat.
- Co-developed a Flask platform that links pollution surges to wind direction to flag likely sources and generates draft GSPCB complaint PDFs on demand (ReportLab).
- *Tech:* Python, Flask, Pandas, NumPy, scikit-learn, Chart.js, ReportLab, OpenWeatherMap API

SatQuery AI – Multimodal Satellite Image Analysis
- Built the frontend and fine-tuned Qwen vision-language models with PEFT/LoRA to answer questions about satellite images and detect changes over time, using both optical and radar (SAR) data.
- *Tech:* Python, PyTorch, Hugging Face Transformers, Qwen VLM, PEFT/LoRA, Flask, GeoTIFF

Personal Portfolio Website | priya-dev.vercel.app
- Designed and built an interactive 3D portfolio with animated scene transitions and sound to present projects, certificates, and experience.
- *Tech:* JavaScript, HTML, CSS, React, Three.js, WebGL, Web Audio API

OPEN SOURCE, RESEARCH & ACHIEVEMENTS

Open Source Contributor | GoFr (gofr-dev/gofr)
- Fixed command-line request parsing so parameter values containing equals signs are preserved, and added tests (PR #4262, merged).

RAG Security Research
- Researching security vulnerabilities and attack surfaces in Retrieval-Augmented Generation systems, extending PoisonedRAG with semantic defense layers.

Hackathons
- Shortlisted in online rounds of 10+ hackathons, including competitions with 3,000+ participants.
